

(a) NARMA10 recurrence

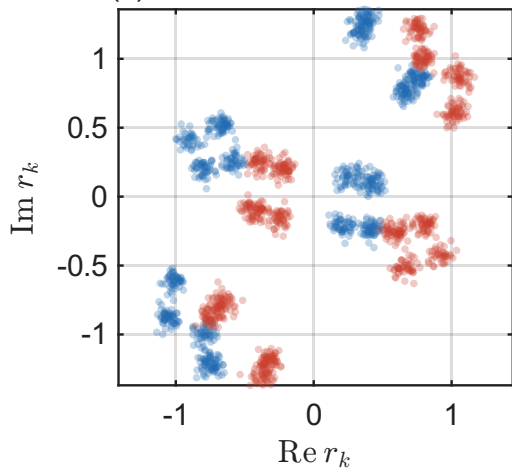

— input (rescaled) —  $y_k$

(b) Coherent phase channel

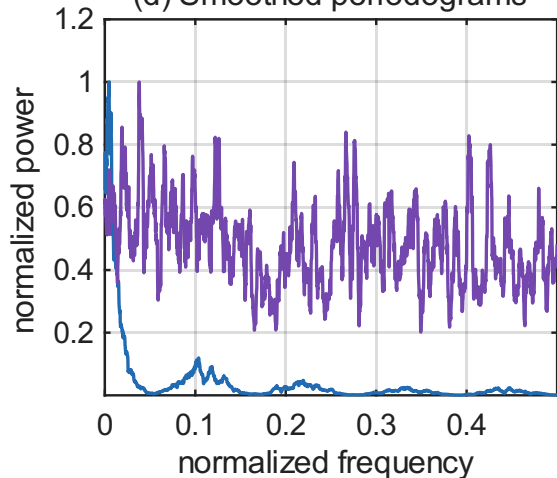

— delayed BPSK target —  $\arg r_k / \pi$

(c) ISI-distorted received field

●  $s_{k-2} = -1$  ●  $s_{k-2} = +1$

(d) Smoothed periodograms

— recurrence target — received phase
