

(a) Equal-readout comparison

(b) Observable dependence

Legend for (a):

- bosonic q., $J=0$ (blue circles, solid line)
- tapped ESN (purple triangles, solid line)
- NVAR-3 (orange inverted triangles, dashed line)
- bosonic q., $J=0.65$ (red squares, solid line)
- NVAR-2 (green diamonds, solid line)
- input delays (black crosses, dashed line)

Legend for (b):

- intensity, $J=0$ (blue circles, solid line)
- quadratures, $J=0$ (purple triangles, solid line)
- intensity, $J=0.65$ (red squares, solid line)
- quadratures, $J=0.65$ (green diamonds, solid line)
